### Tailored Guidance
Every organization has different needs. Our HIPAA Security Training makes it easy for you to customize instruction exclusively for your organization and its unique group of employees.

### Up-to-Date Content
Just as your organization's healthcare practices must be kept up-to-date to effectively treat patients, employees must be trained on current security issues and solutions to effectively secure your organization.

### Real Life Examples and Applications
Our trainings provide palpable examples, applications, and stories that your employees can relate to and learn from.

### High Engagement and Interaction
Most employees don't look forward to a full day of training. Our trainings were created to be highly engaging and interactive to increase the level of retention and organization-wide application.

### Training Completion Management
It's important to know which employees have completed their training, and when. SecurityMetrics HIPAA Training allows you to easily monitor training completion and deadlines.

### Comprehensive Trainings
SecurityMetrics provides security training that takes you beyond HIPAA compliance. Other training courses include PCI DSS Security, Security Awareness, and Security Basics.

### About SecurityMetrics
SecurityMetrics is a global leader in data security and compliance that enables businesses of all sizes to comply with financial, government, and healthcare mandates. Since its founding date, the company has helped over 1 million organizations protect their network infrastructure and data communications from theft and compromise with exceptional value to customers worldwide. Among other services, SecurityMetrics offers HIPAA assessments, PCI audits, penetration tests, security consulting, data discovery, and forensic analysis.
