

SecurityMetrics

PCI P2PE Assessment

As your customers seek solutions to reduce their PCI DSS scope, security costs, and risk of card data compromise, SecurityMetrics helps you advance your end-to-end solution through world-class PCI P2PE assessments.

As a service provider you may question how to begin offering a Payment Card Industry (PCI) compliant Point-to-Point Encryption (P2PE) solution, and what requirements you must fulfill to securely implement this solution. SecurityMetrics P2PE Qualified Security Assessors (QSA) dedicate their time to educate, answer questions, and help you achieve a successful P2PE audit.

Step-by-Step Guidance

SecurityMetrics is one of only a few companies worldwide that conducts P2PE assessments. SecurityMetrics P2PE QSAs guide you through audit preparation, onsite assessment of data flows and processes, key-management processes, solution remediation, and the final P2PE Report on Validation (P-ROV) submission to the PCI Security Standards Council (PCI SSC). By taking advantage of SecurityMetrics PCI P2PE Assessments you can:

- **Prepare for lasting compliance** with upfront education and instruction to help you understand what to expect and how to reach PCI P2PE compliance requirements
- **Take a smarter approach to PCI P2PE audits** with detailed and accurate assessment methods that focus on exposing common process flaws early and accelerate overall audit process
- **Get the attention your audit requires.** SecurityMetrics QSAs are never overbooked,

which allows them to provide appropriate attention to your business needs

- **Validate and maintain compliance** with the help of SecurityMetrics QSA expertise that doesn't stop at discovering process weaknesses. SecurityMetrics QSAs help you establish controls to validate and maintain PCI P2PE compliance for your end-to-end solution

A Higher Standard of Service

SecurityMetrics differentiates itself from other P2PE QSAs by conducting PCI assessments that benefit you through:

- A commitment to take the time to understand your operations and processes to accurately scope the cost and effort of the assessment
- Trusted leadership and experience as a full-service PCI compliance partner
- Establishment of long-term customer relationships through performance, value, and integrity rather than mandatory long-term contracts
- Simple, straightforward pricing with no hidden charges or add-on fees
- Assurance that when you have questions or support issues you can quickly get answers

PCI P2PE Audit Process:

SecurityMetrics completes your assessment with quality results you can trust. The SecurityMetrics PCI P2PE Assessment team provides you the following services:

1. **Custom Price Quote** – Personalized quote to maximize your service and minimize your price.
2. **Pre Onsite Consulting** – Initial assessment review to educate, set expectations, and prepare for an onsite assessment of your P2PE solution.
3. **Onsite Assessment** – Review of Point of Interaction (POI) device, device management, encryption/decryption environment, third party applications, inventory management, key management, PCI DSS compliance, cardholder data flows, and solution documentation for non-compliance.
4. **Post Onsite Summary Report** – Quick initial feedback on compliance status and remediation needs.
5. **Remediation Work** – Consulting to resolve any non-compliance issues.
6. **PCI Report Preparation and Submission**– Documents compliance to PCI requirements, provides you with the P2PE Report on Validation (P-ROV) for review, and then submits compliance status to PCI SSC.

To simplify your PCI compliance efforts, when you engage SecurityMetrics for your PCI P2PE Assessment, you will also benefit from the following:

- **No Surprise Pricing**- SecurityMetrics PCI P2PE Assessment pricing is simple. There are no hidden charges, no add-on fees, and no onsite hourly charges. SecurityMetrics gives you one price that won't change.
- **Higher Standard of Service**- SecurityMetrics QSAs are accurate, experienced, easy to work with, responsive to your needs, and provide comprehensive assessments. Clients enjoy working with SecurityMetrics QSAs so much that over 90% of customers return the following year.
- **Experienced and Approachable QSAs**- SecurityMetrics QSAs have in-depth

SecurityMetrics has been globally awarded for its unmatched customer service. When you partner with SecurityMetrics, not only will you be satisfied with detailed work, but also world-class support.

understanding of the PCI landscape, effective PCI assessment methods, and superior customer support. You are given direct QSA access to receive responsive guidance before, during, and after your PCI P2PE assessment.

- **No Long-Term Contracts**- SecurityMetrics doesn't lock you into a contract. It establishes long-term customer relationships through performance, value, and integrity rather than mandatory, long-term contracts
- **Single Point of Contact**- To keep communication lines open and eliminate confusion, SecurityMetrics assigns a single point of contact for each assessment.
- **Full-Service PCI Expert**- With expertise in PCI DSS assessments, forensic incident response, vulnerability scanning, penetration testing, card data discovery, security appliances, PA-DSS assessments, PCI P2PE assessments, training, and consulting, SecurityMetrics is one of only a few companies that holds credentials for all aspects of PCI DSS compliance.

About SecurityMetrics

SecurityMetrics is a global leader in merchant data security and compliance for all business sizes and merchant levels, and has helped over 1 million organizations manage PCI DSS compliance and/or secure their network infrastructure, data communication, and other information assets. As an Approved Scanning Vendor (ASV), Qualified Security Assessor (QSA), Payment Application Qualified Security Assessor (PA-QSA), Point-to-Point Encryption Qualified Security Assessor (P2PE QSA), Penetration Test Analyst, and Payment Card Industry Forensic Investigator (PFI), SecurityMetrics has the tools available to help businesses achieve lasting security and validate accurate PCI compliance.
